1. Select **Batch re-save** from the File drop-down menu within KONTAKT's Main Control Panel:

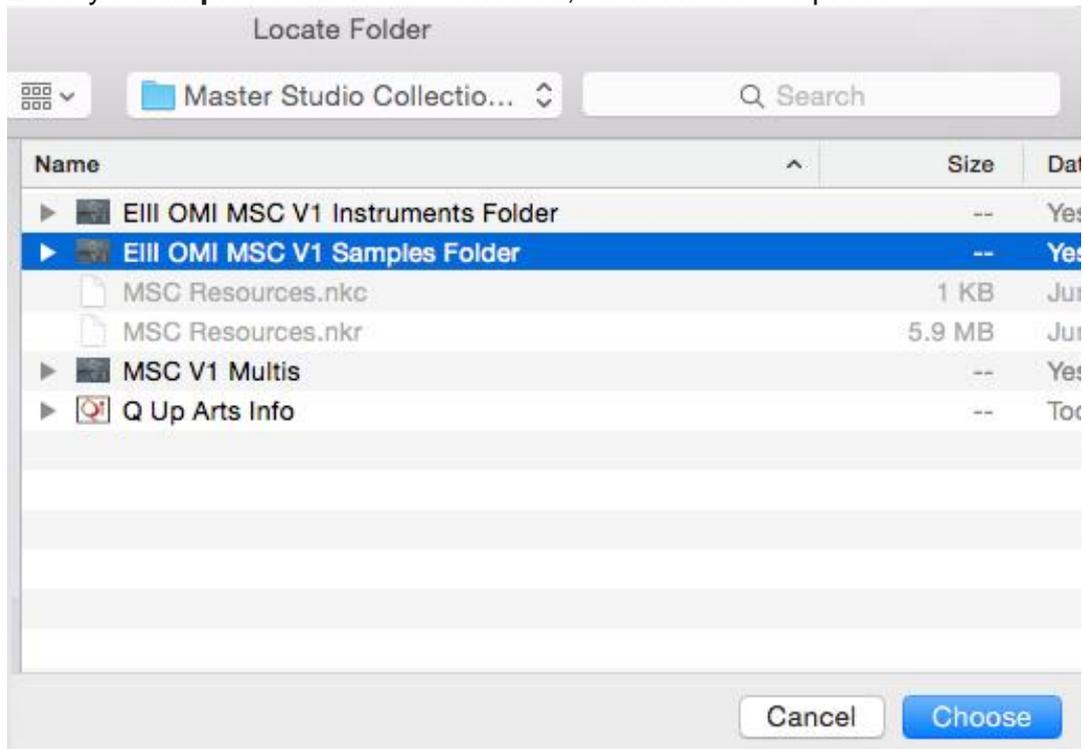

2. A warning dialog appears. Click Yes to proceed:

3. Locate the Library folder in the OS X Finder or Windows Explorer. In this example, we are selecting **The EIII OMI MSC V1 Library**. Once selected, click **Choose** to proceed:

4. At this point, KONTAKT will check the Library. If wallpaper pics, .nkr's or other resource files are missing select "Browse for files". If samples are missing, a **Samples Missing** dialog will appear. In this dialog appears, click **Browse for folder**:

5. In the **Locate Folder** window which now appears, select your
Library's **Samples** folder. Once selected, click **Choose** to proceed:

KONTAKT will now batch re-save the Library and re-link all the Library's Instruments to
their respective sample content. Your KONTAKT Library's Instruments will now load
correctly!
