## acoustic guitar dura-tone® coated

### Fender® String Construction

Coated 80/20 bronze.

### Tone Descriptor

Clear and bright.

### Music & Playing Styles

Fender® Dura-Tone® strings feature brightness and clarity with extra long life. They are an excellent all-purpose string, whose clear, even tones make them the perfect choice for most styles of acoustic music.

### Special Features / Benefits

We started with our 80/20 bronze strings and added a specially applied micro-treatment to make Fender® Dura-Tone® strings. This special coating resists tone-killing grime and corrosion, resulting in a string that lasts up to five times longer while retaining natural feel and clear, full tone.

By the way, Dura-Tone® is also an excellent choice for guitars on display that may be subject to humidity changes or the many hands of numerous players.
