- Integrated current limit protects your ears and headphone
- Convenient belt-pack clip included
- Mounts easily on a standard mic stand with $\frac{5}{8}$ " and $\frac{3}{8}$ " thread
- “Built-like-a-tank”, impact-resistant metal chassis
- Extremely rugged construction ensures long life even under the most demanding conditions
- 3-Year Warranty Program*
- Conceived and designed by BEHRINGER Germany

The POWERPLAY P1 Personal In-Ear Monitor (IEM) Amplifier puts control where it's most useful – right at the artist's fingertips. Whether on stage or in the studio, the P1 provides performers and recording artists with a dependable and affordable personal monitoring solution.

Drummer-Proof Output

The P1's high-power headphone output ensures that as the band gets louder, you'll still be able to hear every nuance of your performance. And the P1's simple user interface makes it easy for everyone to dial in a perfect mix every time.

Using the P1 also helps protect your hearing in two ways. First, thanks to a built-in current limiter, unexpected peaks in signal level won't get to your ears. Second, the simple act of wearing headphones or earbuds helps isolate your ears from loud stage volume of instrument amps and monitor wedges. With the P1, you can clearly hear your own

performance and blend in the ideal amount of the rest of the band.

The Perfect Monitor Mix

Dual XLR inputs allow 2-channel, mono or stereo operation with a convenient mix function which allows you to run two sources into the P1 and dial-in exactly what you want to hear as you perform. Two simple controls, Level and Balance, help you achieve the perfect mix in an instant. The P1 lets you take control of what you hear and allows the engineer to concentrate on providing the audience the best listening experience. Plus, setup is so fast and easy, letting you concentrate on putting on the best performance when you hit the stage.

Personal In-Ear Monitor Amplifier

Power to Last

One little 9 V battery lasts up to 12 hours, so the P1 will go as long as your next show or studio recording session! Or, use the optional PSU-SB DC power supply for the ultimate in dependable power. And the P1's metal chassis is built like a tank to handle even your most-demanding and energetic performance. Small enough to hang on your belt – or mount on a mic or drum stand, the P1 puts complete balance and volume control in your hands.

More Power to You

With rock solid monitoring, your performance naturally will be at the top of your game. Get the power to hear what you want to hear – with the POWERPLAY P1. The whole band will thank you!

You Are Covered

We always strive to provide the best possible Customer Experience. Our products are made in our own MUSIC Group factory using state-of-the-art automation, enhanced production workflows and quality assurance labs with the most sophisticated test equipment available in the world.

As a result, we have one of the lowest product failure rates in the industry, and we confidently back it up with a generous [3-Year Warranty program](#).
