Get Smart, get moving!

SMARTFADE ML

Introducing ETC's new SmartFade ML — moving light control at a Smart price

If you thought you weren't ready for moving lights, think again. SmartFade ML, the newest member of ETC's Smart Solutions™ family, gives you the power you need in the most compact board available.

Super-affordable, versatile and simple to use, SmartFade ML's 24 hands-on faders make moving lights accessible to anyone.

No production is too small to have great moving-light control by ETC.

For more information visit **www.etcconnect.com**

SmartFade ML

- Control for up to 24 moving lights and 48 separate dimmers
- 1024 outputs on 2 x DMX connectors
- Colour-coded backlit elastomer keys
- Encoder or fader control of moving light parameters
- Focus and intensity effects built-in

SmartFade ML

SMART SOLUTIONS FOR MOVING-LIGHT CONTROL, FROM ETC!

Smart value

SmartFade ML brings true hands-on moving-light control to the Smart family of ETC products. A feature-rich ultra-compact console, ideal for basic rigs, SmartFade ML continues the Smart tradition of quality ETC gear and service, at a smart price!

SmartFade ML packs powerful features and capacity into a small portable package. Convenient and lightweight at 686 mm x 254 mm x 63.5 mm and 2.7 kg, SmartFade ML gives you control of up to 48 channels of intensity control and up to 24 moving lights, two full universes of DMX output (512x2), MIDI in and out and USB connectivity with a PC.

SmartFade ML's complete fixture library, direct access command style and hands-on controls make set up quick — giving you more time to focus on what's really important — the look of your show.

Ordering Information

Part #	Description
7219A1401	SmartFade ML Console

SmartFade ML Accessories

Part #	Description
A128	SD Memory Card
PS313-F	International Power Supply, replacement/spare
7219A4014	Dust Cover, SmartFade 24/96 and SmartFade ML

Smart idea

Get moving with SmartFade ML's intuitive operation. Color-coded elastomer keys use LEDs to indicate functionality, data types, and even the color mix of selected fixtures. SmartFade ML doesn't need a monitor to get you quickly programming moving lights, but for a more detailed view of your show data you can easily connect the console to a PC running the powerful SmartSoft application. SmartSoft gives you the ability to see and edit all your show data at once on a PC monitor, including the ability to enter text labels.

- 24 multipurpose faders for intensity control, parameter control, memories and sequences
- 12 pages of memories (288 total) and 24-step sequences (144 total)
- 199-Step Stack for theatrical-style show playback with crossfader pair, GO and PAUSE keys
- Full-access patch functions across two universes of DMX (1,024 outputs)
- LTP operation of moving-light parameters, HTP operation of intensity
- Built-in shape and linear effects
- Parameter "Fan" and Copy channel functions

Smart design

SmartFade ML's hardware is elegant and easy to use, outperforming any comparable console and your expectations!

- LED backlit buttons: dynamically color-coded to indicate functionality, and fully dimmable to facilitate operation in the brightest or darkest of locations
- LCD displays for parameter controls, configuration settings, timing and preview functions
- Show file data is kept in the console and can also be recorded to an SD card for external storage. Multiple show files can be stored on a single SD card
- DMX output is supported for two universes of DMX512
- A USB connector provided for connection to a PC for use with SmartSoft and software upgrades
- MIDI input and output supported (on two connectors) for use with show control systems and for linking multiple SmartFade consoles
