

# Cut By *Diamond*

Waves Diamond bundle is for everyone who needs a comprehensive set of audio processing tools. The Diamond Bundle includes Waves Platinum, Restoration, and Transform bundles for a total of 35 processors forming your studio's processing core.

Diamond reflects unprecedented scope of Waves signal processing mastery, bringing to your studio the fruits of years of proven and award winning engineering excellence in audio. Select from a multifaceted array of tools for tracking, mixing, mastering, creative sound design, audio restoration; Puristic, analog-modeled, surgical tools, or sound bending, Diamond has all facets.

35 processors: for total creativity and processing tour-de-force under one hood

Tools for EVERY application: tracking, mixing, mastering, sound design, audio restoration, creative

Choice of processing style: transparent, surgical, analog, vintage – every processing flavor you can wish for

Cost Effective: Pay less than Platinum + Restoration + Transform ; Have all the tools you need exactly when you need them.

Years of Research & Design excellence: doesn't your audio deserve the best?

WaveShell: means support for all popular plug-in formats and audio editors - TDM, RTAS, AudioSuite, VST, DirectX, MAS, Audio Units.

Upgrades are available to Diamond from other Waves bundles, see your Waves dealer for additional information.
