Safety instructions

Intended use

This device serves as a source for phantom power for the operation of suitable microphones. Any other use or use under other operating conditions is considered to be improper and may result in personal injury or property damage. No liability will be assumed for damages resulting from improper use.

Danger for children

Ensure that plastic bags, packaging, etc. are disposed of properly and are not within reach of babies and young children. Choking hazard! Ensure that children do not detach any small parts from the product. They could swallow the pieces and choke! Never let children unattended use electrical devices.

Where to use the product

Never use the product

- in conditions of extreme temperature or humidity
- in extremely dusty or dirty areas
- at locations where the unit can become wet

General handling

- To prevent damage, never use force when handling the product.
- Never immerse the product in water. Just wipe it with a clean dry cloth. Do not use liquid cleaners such as benzene, thinners or flammable cleaning agents.
- Disconnect the device from the mains power supply when it is not in use.

Operating

1. Connect up to two microphones requiring phantom power for operation to the inputs [MIC 1] and [MIC 2].
2. Select the appropriate voltage, [12 V] or [48 V], for the connected microphones with the 'Phantom Voltage' switch.
3. Use the enclosed plug-in mains adapter to power the device or insert 2 × 9 V batteries into the battery compartment for power supply.
4. Connect the device that is to process the microphone signals to the outputs [MIC 1] and [MIC 2].
5. Since the device contains no preamps, no signal amplification takes place.
