

MOUNTING INSTRUCTIONS

BASS TRAPS

These instructions are for the following products: CBT-37, CBT-37 Flock, CBT-37 Melamine, CBT-1, CBT-2, CBT-3, Melamine Cornertube, AC-37.

TOOLS

The following tools are needed for installation:

- ✓ Box Cutter
- ✓ Level
- ✓ Caulk Gun
- ✓ Folding ruler or tape measure
- ✓ Pencil
- ✓ **t.akustik glue**

We recommend using our t.akustik glue for installation.

UNBOXING

Open the package carefully! Inserting sharp objects into the package can damage the bass traps. Avoid using long, sharp tools for opening the package!

REMOVE PRODUCTS FROM PACKAGING

Carefully remove the products from the package. Bass traps come with two elements per package. Take care when separating the elements from each other, especially with melamine foam models.

DETERMINE THE POSITION

While determining the mounting positions, it helps to mark the walls and ceiling using a level and tape measure. The angle between the walls must be verified prior to installation.

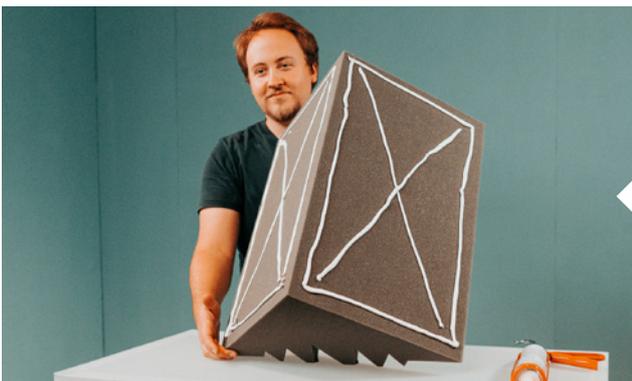

PREPARE THE CAULK GUN

Carefully open the glue cartridge using a utility knife. Take care to point the knife away from your body. Thread the included nozzle onto the opening. Insert the cartridge into the caulk gun. *For thicker lines of glue, you can use the knife to enlarge the opening of the nozzle.*

APPLY THE GLUE

Apply the glue to the back of the bass trap in an even line along the outer edges. It also helps to apply some glue to the center of the bass trap in an X pattern, in order to hold the center firmly in place on both walls. *Depending on the condition of the walls and corners, custom cuts may need to be made.*

LET GLUE SET FOR 5 MINUTES

Before mounting the bass trap on the wall, let the glue set for 5 minutes on the element. This ensures that it can develop its full holding strength.

INSTALL THE BASS TRAP

Press the bass trap into the corner in the marked position and apply even pressure to the lines of glue for 2 minutes. Repeat the process for any additional elements and stack them on top of each other. That's it!

TIP:

Depending on the condition of the wall, it is recommended to apply a thicker line of glue by enlarging the nozzle of the cartridge using a utility knife.
