

MOUNTING INSTRUCTIONS

ABSORBER

These instructions are for the following products: PET Wall Absorber 120, PET Wall Absorber 60

TOOLS

The following tools are needed for installation:

- ✓ Level
- ✓ Pencil
- ✓ Screwdriver
- ✓ Folding ruler
- ✓ Drilling machine
- ✓ Drill bits
- ✓ Dowels (4 × 6 mm)
- ✓ L-hooks

Make sure to use the correct type of dowels for your mounting surface (drywall, masonry, concrete, etc.).

UNBOXING

Open the package carefully! Inserting sharp objects into the package can damage the absorber. Avoid using long, sharp tools for opening the package!

REMOVE PRODUCTS FROM PACKAGING

Carefully remove the products from the package and remove the protective film. Also remove the included dowels and L-hooks and set them aside.

DETERMINE THE POSITION

While determining the positions of the holes, it helps to mark the walls using a level and a folding ruler, in order to achieve even spacing in relation to corners, sound sources and other absorbers.

DRILL THE HOLES

Drill the holes at the markings using the drilling machine.

INSERT DOWELS + MOUNTING L-HOOKS

Insert the dowels into the drilled holes and screw the L-hooks into the dowels for installing the absorber.

ATTACHING THE ABSORBER

Now you can attach the absorber to the L-hooks. Install more elements if you wish. That's it!

TIP:

Make sure to examine the condition and load carrying capacity of the wall before installation.
