FireBall V DYNAMIC INSTRUMENT MICROPHONE

OVERVIEW:
Designed, assembled and tested by Audix in the USA, the FireBall V is a professional dynamic instrument microphone intended for harmonica (both diatonic and chromatic) and beatbox. Clear, accurate, and capable of handling sound pressure levels in excess of 140 dB without distortion, the FireBall V is ideally suited for both live stage and recording applications and has the added convenience of a volume control.

The FireBall V is characterized with a cardioid pickup pattern for isolation and feedback control, and is equipped with a VLM™ (Very Low Mass) diaphragm for natural sound reproduction with exceptional transient response.

With a wide frequency response of 50 Hz - 16 kHz, the FireBall V is lightweight, compact and comfortable to hold. Roadworthy construction includes a precision cast zinc alloy body, steel mesh grill, black e-coat finish, laser etched model and serial number, Switchcraft® XLR connector and includes a tension-fit heavy duty nylon mic clip.

The FireBall V is a low impedance microphone; when using the FireBall V with a guitar amplifier, a high quality low-high impedance transformer (such as T50K) is required.

SUPPLIED ACCESSORIES:
Heavy duty press fit mic clip (DCLIP)
Carrying pouch (P1)

OPTIONAL ACCESSORIES:
WS357 - External foam windscreen
DVICE - Spring loaded rim mount clamp
DCLAMP - Tension rod mic clamp
CBL-20 - 20’ XLR-XLR mic cable
CBL-DR25 - 25’ right angle XLR-XLR mic cable
CBL-BP360 - 4’ adapter cable for RAD360 Wireless Bodypack
T50K - High quality low-high impedance transformer

FEATURES:
Volume knob
Fits comfortably in the palm of the hand
Handles “cupping” without impacting sound quality
Full size dynamic capsule
Clear and accurate sound reproduction
High SPL handling without distortion
Exceptional gain before feedback
Provides excellent isolation from other instruments on stage
5 year warranty

APPLICATIONS:
Live stage, studio
Harmonica
Vocals
Beatbox
Percussion
Saxophone, trumpet, trombone
Flute
Accordian

ARCHITECTS AND ENGINEERS SPECIFICATIONS:
The microphone shall be of the dynamic type operating on the moving coil principle and the polar pattern of the microphone shall be cardioid. The nominal output impedance shall be equal to 150 ohms at 1 kHz. The microphone shall have a sensitivity of 1.5 mV / Pa at 1 kHz and a sound pressure level ≥140 dB. The microphone body shall be of die cast zinc alloy and the grill of steel mesh. The overall dimensions shall be 21mm in diameter at the base, 53.5 mm at the widest point on the grill, and 99.5 mm in length. The microphone shall be the Audix FireBall V.

OPERATION:
The FireBall V is a low impedance microphone and should be plugged into a “mic level” input on your console, mixer, or recording device. Please note that your microphone does not require phantom power and will not be affected in any way by phantom power should it be running simultaneously when the microphone is in operation. Avoid plugging or unplugging the microphone from the PA system unless the channel is muted or the volume of the system turned down. Failure to do so may result in a loud “popping” noise which could seriously damage the speakers in the PA system.

USER TIPS:
The FireBall V has a tight (cardioid) pick-up pattern in order to help eliminate sound from other instruments on stage from “bleeding” into the microphone.

The FireBall V is a low impedance microphone, however, it may be plugged directly into a guitar amp by using the Audix T50k impedance converter. This will allow for the proper gain structure and will insure the best possible sound quality.

Allow a distance of 2-3 feet between microphones to avoid phase cancellation issues.

***All specifications subject to change without notice.

SERVICE AND WARRANTY:
This microphone is under warranty for a period of 5 years from any and all manufacturing defects. Should your microphone fail in any way, please contact the Audix Service department at 503-682-6933. A Return Authorization number is required before returning any products.

CARE AND MAINTENANCE:
The Fireball V is manufactured to exacting specs with roadworthy construction. However, the capsule is highly sensitive and should be handled with care. Avoid extreme temperatures and be sure to store your microphone in the pouch provided when not in use. Moisture of any kind can adversely affect the sound and performance of your microphone.
