

Introduction

Silverblade PCX2 Exonerator for computers.
Thank you for purchasing the Silverblade PCX Exonerator. We would like to thank you for your confidence in the product and hope that you will enjoy your new Exonerator.

Building

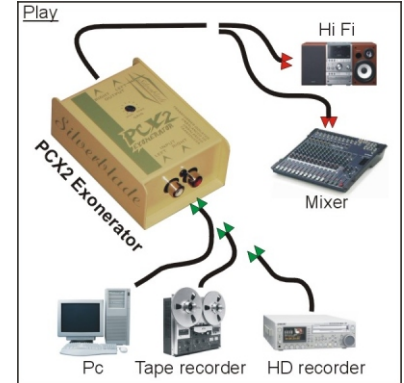

The PCX2 Exonerator has been developed to solve many problems. First of all by the help of PCX the ground hum and buzz is eliminated.

Secondly It eliminates the disturbing noises causes by the high-frequency clock signal of the computer. The PCX2 Exonerator's phono sockets can be conveniently connected to the computer's sound card outputs. Sometimes these noises come from the community antenna installations. it can eliminate all disturbing noises.

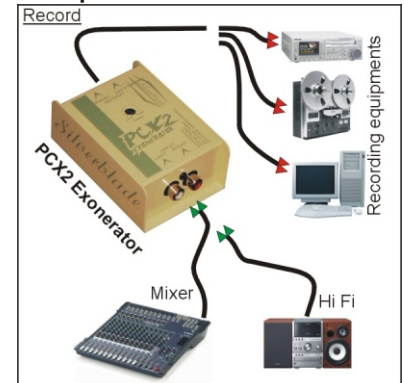

Setting up is easy - Connect the PCX2 outputs directly to the mixer or hi-fi, the inputs could be connected to the pc or recorders etc. In this application the PCX2 transmits the signal to the sound system.

Another application is to connect: the PCX2 outputs could be connected directly to the recording equipment and the inputs to the mixer or hi-fi etc. In this case the signal is transmitted to the recording equipment by the help of PCX2. The output level can be controlled by the GAIN pot.
