

Manual

Kick Box™ Basic

Congratulations and thank you for purchasing a FINHOL product. FINHOL produces at highest standards. All Finhol products are strictly quality inspected before delivery.

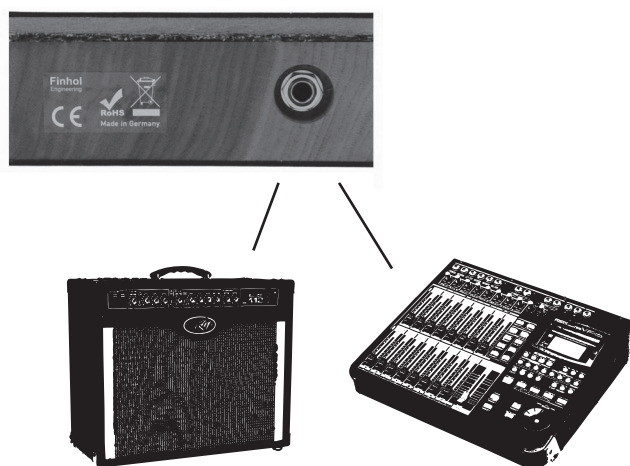

The Kick Box™ Basic is a inexpensive conventional stomp-box with a built-in dynamic microphone capsule.

The design is based on a study on „physical principles of electro-acoustic stomp boxes“.

Based on the results of this study, we have developed a new miking and damping technology, the SMD™ Technology (Sandwich Midfrequency Damping Technology). With this technology, a much better bass is achieved, at the same time this technique prevents the annoying middle frequencies, which sounds very thin with comparable stomp boxes. Nevertheless you need for this stompbox, in contrast to our digital kickboxes, a powerful amplifier system with a good EQ sound control.

The device can be connected using a unbalanced standard jack cable.

The Kick Box™ Basic requires no power supply.

Technical Data

- Dynamic Microphone
- Impedanz 600 Ohm
- Solid walnut (150x120x40 mm)
- Weight appr. 220 gr.
- Exit surface coated with EPDM
- Anti-slip mat
- Output jack 6.3 mm unbalanced
- CE, ROHS, Made in Germany

Warning!

Store the product in a place that is neither excessively dry nor excessively moist. And since the temperature influences the humidity neither excessively hot ore excessively cold.

Don` t take this product apart and don` t try to repair it yourself.

Always keep this product in a case ore gigbag, to it`s safety.
