1 General information

This manual contains important instructions for the safe operation of the unit. Read and follow the safety instructions and all other instructions. Keep the manual for future reference. Make sure that it is available to all those using the device. If you sell the unit please make sure that the buyer also receives this manual.

Our products are subject to a process of continuous development. Thus, they are subject to change.
1.1 Further information

On our website [www.thomann.de](http://www.thomann.de) you will find lots of further information and details on the following points:

<p>| | |</p>
<table>
<thead>
<tr>

<tbody>
<tr>
<td>Download</td>
<td>This manual is also available as PDF file for you to download.</td>
</tr>
<tr>
<td>Keyword search</td>
<td>Use the search function in the electronic version to find the topics of interest for you quickly.</td>
</tr>
<tr>
<td>Online guides</td>
<td>Our online guides provide detailed information on technical basics and terms.</td>
</tr>
<tr>
<td>Personal consultation</td>
<td>For personal consultation please contact our technical hotline.</td>
</tr>
<tr>
<td>Service</td>
<td>If you have any problems with the device the customer service will gladly assist you.</td>
</tr>
</tbody>
</table>
1.2 Notational conventions

This manual uses the following notational conventions:

**Letterings**

The letterings for connectors and controls are marked by square brackets and italics.

**Examples:** [VOLUME] control, [Mono] button.

1.3 Symbols and signal words

In this section you will find an overview of the meaning of symbols and signal words that are used in this manual.
<table>
<thead>
<tr>
<th>Signal word</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>DANGER!</strong></td>
<td>This combination of symbol and signal word indicates an immediate dangerous situation that will result in death or serious injury if it is not avoided.</td>
</tr>
<tr>
<td><strong>NOTICE!</strong></td>
<td>This combination of symbol and signal word indicates a possible dangerous situation that can result in material and environmental damage if it is not avoided.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Warning signs</th>
<th>Type of danger</th>
</tr>
</thead>
<tbody>
<tr>
<td>![High-voltage symbol]</td>
<td>Warning – high-voltage.</td>
</tr>
<tr>
<td>![Danger zone symbol]</td>
<td>Warning – danger zone.</td>
</tr>

</table>
2 Safety instructions

Intended use

This device is intended to be used for the distribution of DMX signals from one to multiple DMX chains, or to extend a DMX chain. Use the device only as described in this user manual. Any other use or use under other operating conditions is considered to be improper and may result in personal injury or property damage. No liability will be assumed for damages resulting from improper use.

Any other use or use under other operating conditions is considered to be improper and may result in personal injury or property damage. No liability will be assumed for damages resulting from improper use.
Safety

**DANGER!**

**Danger for children**
Ensure that plastic bags, packaging, etc. are disposed of properly and are not within reach of babies and young children. Choking hazard!

Ensure that children do not detach any small parts (e.g. knobs or the like) from the unit. They could swallow the pieces and choke!

Never let children unattended use electrical devices.

**DANGER!**

**Electric shock caused by high voltages inside**
Within the device there are areas where high voltages may be present. Never remove any covers.

There are no user-serviceable parts inside.

Do not use the device if covers, protectors or optical components are missing or damaged.
DANGER!
Electric shock caused by short-circuit
Do not modify the mains cable or the plug. Failure to do so could result in electric shock/death or fire. If in doubt, seek advice from a registered electrician.

NOTICE!
Risk of fire
Do not block areas of ventilation. Do not install the device near any direct heat source. Keep the device away from naked flames.

NOTICE!
Operating conditions
This device has been designed for indoor use only. To prevent damage, never expose the device to any liquid or moisture. Avoid direct sunlight, heavy dirt, and strong vibrations.
NOTICE!

Power supply

Before connecting the device, ensure that the input voltage (AC outlet) matches the voltage rating of the device and that the AC outlet is protected by a residual current circuit breaker. Failure to do so could result in damage to the device and possibly injure the user.

Unplug the device before electrical storms occur and when it is unused for long periods of time to reduce the risk of electric shock or fire.
3 Features

- Professional DMX splitter with following functions:
  - Distribution of the DMX-512 signal to eight DMX chains in active mode
  - Looping the DMX-512 signal in passive mode
  - Amplification of the DMX-512 signal for longer distances to the controlled DMX devices
  - Processing of attenuated or disturbed DMX-512 signals
  - Reduction of reflections that can cause transmission interference
  - The galvanic isolation of in and outputs and among the outputs ensures a protection against damage from power surges of up to 2000 V

- 1 × DMX input
- 1 × passive DMX output
- 8 × active DMX outputs
- 2 × USB ports (5 V, 1 A), e.g. for charging mobile phones
- 19" rack-mountable
4 Installation and starting up

Unpack and carefully check that there is no transportation damage before using the unit. Keep the equipment packaging. To fully protect the device against vibration, dust and moisture during transportation or storage use the original packaging or your own packaging material suitable for transport or storage, respectively.

Create all connections while the device is off. Use the shortest possible high-quality cables for all connections. Take care when running the cables to prevent tripping hazards.

**NOTICE!**

**Possible data transmission errors**

- For error-free operation, make use of dedicated DMX cables and do not use ordinary microphone cables.
- Never connect the DMX outputs to audio devices such as mixers or amplifiers.
The following graphic illustrates how to integrate the unit into a DMX configuration.

Use the product (S) as the last part of the DMX chain that begins with your DMX controller (C). Do so, connect the output of the last device to the input of the DMX splitter.

You can connect a DMX chain to each of the device's active DMX outputs (S) (DMX splitter), which in turn can each consist of a maximum of 32 DMX devices. Connect the output of the first DMX device to the input of the second and continue this way until all devices are connected. Make sure that the output of the last DMX device in the chain is terminated by a resistor (110 Ω, ¼ W). You can even expand the configuration of your DMX network if you are running additional DMX splitters at the end of the DMX chains. Keep in mind that the total number of usable DMX addresses in a ‘DMX universe’ is limited to 512.

You can connect another DMX chain consisting of a maximum of 32 DMX devices to the direct DMX output [DMX Thru]. When using this output, the [Pass Thru / Terminated] switch must be in the [Pass Thru] position (not pressed). If the device itself terminates a DMX chain, the [Pass Thru / Terminated] switch must be in the [Terminated] (pressed) position. A terminating resistor is then connected.
Rack mounting

The unit has been designed for rack mounting in a standard 19-inch rack; it occupies one rack unit.

7 Plug and connection assignments

Introduction

This chapter will help you select the right cables and plugs to connect your valuable equipment so that a perfect light experience is guaranteed.

Please take our tips, because especially in ‘Sound & Light’ caution is indicated: Even if a plug fits into a socket, the result of an incorrect connection may be a destroyed DMX controller, a short circuit or ‘just’ a not working light show!

DMX connections

The unit offers a 3-pin XLR socket for DMX output and a 3-pin XLR plug for DMX input. Please refer to the drawing and table below for the pin assignment of a suitable XLR plug.

8 Protecting the environment

Disposal of the packaging material

For the transport and protective packaging, environmentally friendly materials have been chosen that can be supplied to normal recycling.

Ensure that plastic bags, packaging, etc. are properly disposed of.

Do not just dispose of these materials with your normal household waste, but make sure that they are collected for recycling. Please follow the notes and markings on the packaging.

Disposal of your old device

This product is subject to the European Waste Electrical and Electronic Equipment Directive (WEEE). Do not dispose with your normal household waste.

Dispose of this device through an approved waste disposal firm or through your local waste facility. When discarding the device, comply with the rules and regulations that apply in your country. If in doubt, consult your local waste disposal facility.
