

Official report of classification of fire performance of a material

Enisaged in article 5 de cre of november 21, 2002

N° CM-23-P-012

Valid 5 years as from 14/04/2023

Material presents by :

IBENA TEXTILWERKE GmbH

Peterskamp 20

46414 RHEDE

Nature of the test

Electrical burner test

Test report N° :

FE 23-0071-0400 off the 14/04/2023

Trade mar :

9786 Budget Deco Molton

Summary description: *Details of the product description are provided in the supporting test report(s) cited above.*

- Kind of textile Woven
- Composition 100% Cotton
- Mass per unit area 160 g/m²
- Tickness 0,7 mm
- Color Black and white
- Usual term: Walls hung covering, sheers, curtains,...

Classement M1

This classification is valid for any application for which the product is not subject to CE marking.

Durability of the classification : 12 months starting from the implementation in a regulated building

Cleaning conditions : Recommendation of Customer

Scope: This classification is valid for any application for which the product is not subject to CE marking.

This official report attest only characteristics of the sample submitted for testing and does not prejudge similar characteristics of products. It thus does not constitute a certificate of products within the meaning of the L.115-27 article of the code of the consumption and the law of June 3rd, 1994. These conclusions relate only to the resistance/reaction to fire performance of the element that is the subject of the present classification report. They do not prejudge, in any case, other performances related to its incorporation to a work.
