

**DANGER!****Risk of injury from laser!**

This device contains a class 4 laser.

Looking into the laser beam or its reflections can cause serious injuries to the eyes and result in irreversible damage.

Skin contact can result in burns.

Highly flammable and explosive materials within the range of the laser radiation can ignite.

The laser may only be installed and operated by a laser protection representative who is familiar with the legal requirements at the operating location.

Familiarise yourself with the regulations applicable in the country of operation.

Carefully read the user manual and observe all safety instructions.
