

CQ-20B Rack Kit

Fitting Note

The **CQ20B-RK19** kit contains the rack ears and fixing screws required to mount a **CQ-20B** in a standard 19" rack case.

Contents

Item Code	Description	Quantity
AA12065	RACK EAR CQ20B 19" LEFT	1
AA12066	RACK EAR CQ20B 19" RIGHT	1
AB0332	SCREW M4X8 PAN TORX BK	4

Tools required

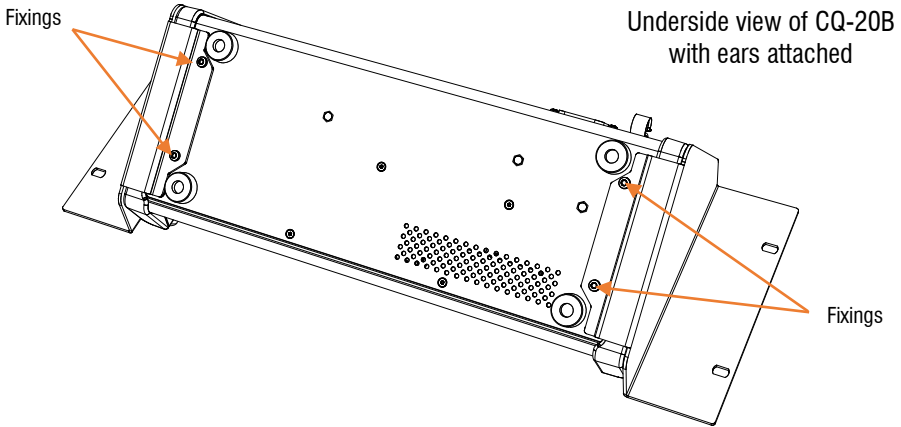

Torx® T20 driver

Fitting ears to the CQ-20B

1. Place the **CQ-20B** on a padded surface with the sockets facing down.
2. Line up the rack ears with the unused screw holes on the underside of the unit, near to the rubber feet, so that the front panel of each ear is parallel to the front (socket) panel of the CQ. Each ear will only align correctly with one side and the right hand ear includes a cut-out for the fan.
3. Secure each rack ear using two of the provided M4 Torx® screws.

ⓘ Use only the supplied fixings to attach the rack ears to the CQ. Using other fittings may cause damage to the unit and/or rack ears.

ⓘ When fitted, there will be a small gap between the ears and sides of the CQ to prevent damage to either.

Mounting in a rack

- Ensure that there is adequate ventilation around all vents and on the right hand side where the cooling fan is located.
- A minimum of 4U of rack space is required.
- Use the p-clip on the rear of the CQ to secure the mains IEC connection before mounting.
