1 General information

This user manual contains important information on the safe operation of the device. Read and follow all safety notes and all instructions. Save this manual for future reference. Make sure that it is available to all persons using this device. If you sell the device to another user, be sure that they also receive this manual.

Our products and user manuals are subject to a process of continuous development. We therefore reserve the right to make changes without notice. Please refer to the latest version of the user manual which is ready for download under www.thomann.de.

1.1 Further information

On our website (www.thomann.de) you will find lots of further information and details on the following points:

Download	This manual is also available as PDF file for you to download.
Keyword search	Use the search function in the electronic version to find the topics of interest for you quickly.
Online guides	Our online guides provide detailed information on technical basics and terms.
Personal consultation	For personal consultation please contact our technical hotline.
Service	If you have any problems with the device the customer service will gladly assist you.

1.2 Notational conventions

This manual uses the following notational conventions:

Letterings

The letterings for connectors and controls are marked by square brackets and italics.

Examples: *[VOLUME]* control, *[Mono]* button.

Displays

Texts and values displayed on the device are marked by quotation marks and italics.

Examples: '24ch', 'OFF'.

Instructions

The individual steps of an instruction are numbered consecutively. The result of a step is indented and highlighted by an arrow.

Example:

1. ➤ Switch on the device.
2. ➤ Press *[Auto]*.
⇒ Automatic operation is started.
3. ➤ Switch off the device.

Cross-references

References to other locations in this manual are identified by an arrow and the specified page number. In the electronic version of the manual, you can click the cross-reference to jump to the specified location.

Example: See  'Cross-references' on page 5.

1.3 Symbols and signal words

In this section you will find an overview of the meaning of symbols and signal words that are used in this manual.

Signal word	Meaning
DANGER!	This combination of symbol and signal word indicates an immediate dangerous situation that will result in death or serious injury if it is not avoided.
CAUTION!	This combination of symbol and signal word indicates a possible dangerous situation that can result in minor injury if it is not avoided.
NOTICE!	This combination of symbol and signal word indicates a possible dangerous situation that can result in material and environmental damage if it is not avoided.
Warning signs	Type of danger
	Warning – danger zone.

2 Safety instructions

Intended use

Drum modules are intended to be used for converting digital trigger signals from drum pads to various percussion sounds. Use the unit only as described in this manual. Any other use or use under other operating conditions is considered to be improper and may result in personal injury or property damage. No liability will be assumed for damages resulting from improper use.

This device may be used only by persons with sufficient physical, sensorial, and intellectual abilities and having corresponding knowledge and experience. Other persons may use this device only if they are supervised or instructed by a person who is responsible for their safety.

Safety

DANGER!

Danger for children

Ensure that plastic bags, packaging, etc. are disposed of properly and are not within reach of babies and young children. Choking hazard!

Ensure that children do not detach any small parts (e.g. knobs or the like) from the unit. They could swallow the pieces and choke!

Never let children unattended use electrical devices.

CAUTION!

Possible hearing damage

With loudspeakers or headphones connected, the device can produce volume levels that may cause temporary or permanent hearing impairment.

Do not operate the device permanently at a high volume level. Decrease the volume level immediately if you experience ringing in your ears or hearing impairment.

NOTICE!

Operating conditions

This device has been designed for indoor use only. To prevent damage, never expose the device to any liquid or moisture. Avoid direct sunlight, heavy dirt, and strong vibrations.

NOTICE!

External power supply

The device is powered by an external power supply. Before connecting the external power supply, ensure that the input voltage (AC outlet) matches the voltage rating of the device and that the AC outlet is protected by a residual current circuit breaker. Failure to do so could result in damage to the device and possibly the user.

Unplug the external power supply before electrical storms occur and when the device is unused for long periods of time to reduce the risk of electric shock or fire.

3 Features

- 550 voices
- 30 preprogrammed drum kits
- 20 user kits
- 100 preprogrammed songs
- 2 user songs
- Quick record
- Metronome
- EQ per kit
- Pitch, reverb, compressor
- Flexible assignment of pad voices
- 6 fader for the volume control of individual pads
- Reverb effect, voice tuning
- Individual adjustment of accompaniment and drum track
- Connections for headphones, AUX, USB and MIDI

4 Installation

Setup, connecting pads and pedals

Setup and assembly of the pads and pedals are described in detail in the enclosed assembly guide. Finally check that all cables between the pads and the e-drum module have been properly connected.

Connecting the power adapter

Use the Y cable to connect the supplied power adapter to the [9 V] port of the e-drum module and the hi-hat controller. Then plug the mains plug into the socket.

Connecting headphones

Connect your stereo headphones to the [PHONES] output of the drum module.

Connecting audio devices

Connect the inputs of your amplifier or active monitors to the [OUTPUT] sockets of the drum module. If you use a mono amplifier, connect its input to the [L/MONO] output socket of the module.

Connecting a CD or MP3 player

Connect a CD or MP3 player to the input socket [AUX IN] IN of the drum module.

Connecting MIDI devices

Connect external MIDI devices to the [MIDI OUT] or [MIDI IN] socket of the drum module.

Connecting USB devices

Connect external MIDI devices or your computer to the USB port [USB MIDI] of the drum module.

5 Connections and controls

Front panel

1	Display
2	[POWER] Main switch. Turns the device on and off
3	[MENU] Button to open the selection menu
4	[SAVE] Button to store settings
5	[VOLUME – MASTER] Overall volume control
6	[VOLUME – AUX IN] Volume control for the AUX input signal
7	[VOLUME – PHONES] Volume control for the headphone output of the device
8	[EXIT] Button to close and exit an open menu
9	▲/▼ Arrow buttons to select an option

10	[ENTER] Button to confirm a selection or setting
11	[TEMPO] Button to adjust metronome and playback tempo
12	[CLICK] Button to turn the metronome on and off
13	▶/■ Button to start and stop song playback
14	● Button to activate the recording function
15	Jog wheel to select a drum kit and quickly set values
16	Fader with switchable assignment for adjusting the volume of individual pads
17	[FADER] Button for switching the fader assignment
18	[SONG] Button to open the 'SONG' menu
19	[KIT] Button to open the 'KIT' menu
20	[<] / [>] Arrow buttons to select a drum kit and quickly set values

Rear panel

21	<i>[PHONES]</i> Connection socket for headphones
22	<i>[USB MIDI]</i> Connection socket for an external MIDI device with USB port
23	<i>[MIDI OUT IN]</i> Connection sockets for an external MIDI device
24	<i>[OUTPUT R L / MONO]</i> Output for external audio devices
25	<i>[TRIGGER IN – TOM 4]</i> <i>[TRIGGER IN – CRASH2]</i> Connection sockets for tom 4 and crash 2
26	<i>[AUX IN]</i> Input for external audio devices like MP3 or CD players
27	<i>[9 V]</i> Connection socket for the power adapter
28	<i>[USB MEMORY]</i> Connection for a USB memory device
29	Multi-pin socket (sub D) for connecting the pads (on the bottom of the device)

6 Operating

6.1 Functions

Turning on / off

Check all cable connections for correct fit before turning on
Before switching on, turn the [VOLUME – MASTER] control to minimum.

Switch the drum module on or off with the main switch [POWER].

Automatic shutoff

If the device is not in use, it shuts off automatically after a settable time.

To disable the automatic shutdown, use the Utility menu (↪ Chapter 6.10 'Utility menu' on page 22).

Adjusting the volume

To set the desired total volume for the Drum Set, turn the [VOLUME – MASTER] control.

Reset to factory defaults

To reset the entire drum module to factory settings, turn it off first. Then hold down the [<] and [>] simultaneously and additionally press [POWER] until the display shows 'Factory Resetting...'.
'

6.2 Selecting and adjusting drum kits

A drum kit is a compilation in which a certain sound (Voice) and several sound parameters are assigned to each pad. Selecting different drum kits lets you customise the sound of your drum kit in seconds to the desired music genre. Besides the 30 preprogrammed drum kits you can also create, customise and save 20 user drum kits.

Selecting a drum kit

To select a certain drum kit, proceed as follows:

1. ➤ Press [KIT].
⇒ The display shows the kit list.
2. ➤ Use the arrow buttons [<] / [>] or the jog wheel to select the desired kit.
The setting is automatically stored.

Assigning a Voice

To programme a certain Voice for a pad, proceed as follows:

1. ➤ Press **[KIT]**.
 - ⇒ The display shows the kit list.
2. ➤ Press **[MENU]**. Use the arrow buttons (**▲/▼**) to select the option 'VOICE' and press **[ENTER]**.
 - ⇒ The display shows the voice list.
3. ➤ Hit the respective pad to activate it.
 - ⇒ The display shows the name of the currently assigned voice.
4. ➤ Use the arrow buttons (**[<]** / **[>]**) or the jog wheel to select the desired voice.
 - The setting is automatically stored.

6.3 Playing the drum kit

Using the black plastic side of the bass drum beater will considerably maximize the lifetime of the mesh head of the bass drum pad. Using the felt side will accelerate the abrasion of the mesh head and may cause the break.

The bass drum beater can be rotated by 180 degrees by loosening the locking screw.

Like on an acoustic drum kit, the pads respond to different playing techniques and dynamics. All pads are velocity sensitive. Some voices change their timbre depending on the punch used.

- Drums
 - With the snare drum we distinguish between Head and Rimshot.
 - Head
 - Strike the head only.
 - Rimshot
 - Simultaneously strike the head and the rim or only the rim of the pad.
- Cymbals
 - We distinguish the following cymbal zones:
 - Bow
 - Play in the area between the edge and the bell of the cymbal.
 - Bell
 - Play the bell area of the cymbal.
 - Edge
 - Play at the edge of the cymbal.
 - Choke
 - Choke Play is possible with Crash and Ride cymbals but not with the Hi-hat. To do so, stop the sound of the Crash and Ride cymbals with the hand at the edge of the cymbal immediately after hitting it.

■ Hi-hat

With the Hi-hat we distinguish between Hi-hat pedal change, open Hi-Hat, closed Hi-hat, Hi-hat pedal and Splash.

- Hi-hat pedal change
When the pedal is pressed in different positions, the voice changes when hitting the Hi-hat pad (similar to an acoustic drum kit).
- Open Hi-hat
Strike the Hi-hat pad without pressing the pedal.
- Closed Hi-hat
Strike the Hi-hat pad with fully pressed pedal.
- Hi-Hat pedal
Press the Hi-hat controller pedal to generate a closed sound without striking the Hi-hat pad.
- Splash
Play the Hi-hat with fully pressed pedal and then open it suddenly.

6.4 Modifying drum kits

Selecting a drum kit

1. ➤ Press **[KIT]**.
⇒ The display shows the kit list.
2. ➤ Press **[KIT]** again to go to the User Kits section.

Customising a drum kit

You can assign a special sound to each individual trigger of the drum kit and set multiple sound parameters.

1. ➤ Select the desired drum kit with the arrow buttons (**[<]** / **[>]**). The selected drum kit is immediately active.
2. ➤ Use the arrow buttons (**▲** / **▼**) to select the parameter to be changed.
3. ➤ Use the arrow buttons (**[<]** / **[>]**) or the jog wheel to change the parameter value.

Parameter, display	Meaning	Value range
KIT NAME	Drum kit selection	Preset: 1 ... 30 User: 31 ... 50
VOLUME	Volume of the pads of the drum kit	0 ... 16
EQ HIGH	Boost / cut of the high EQ frequencies	-12 dB...12 dB
EQ MID	Boost / cut of the mid EQ frequencies	-12 dB...12 dB
EQ LOW	Boost / cut of the low EQ frequencies	-12 dB...12 dB

Customising Voice parameters

Voice parameters always refer only to a single pad. For example, if you change the volume of the snare drum, the other pads are not affected.

1. ➤ Press **[KIT]**.
⇒ The display shows the kit list.
2. ➤ Press **[MENU]**. Use the arrow buttons (▲/▼) to select the option 'VOICE' and press **[ENTER]**.
⇒ The display shows the voice list.
3. ➤ Use the arrow buttons (**[<]** / **[>]**) or the jog wheel to select the pad or play the pad whose parameters you want to adjust.
4. ➤ Use the arrow buttons (▲/▼) to select the parameter to be changed.
5. ➤ Use the arrow buttons (**[<]** / **[>]**) or the jog wheel to change the parameter value.

Parameter, display	Meaning	Value range
TRIGGER	Trigger	KICK, SNARE, SN-R, TOM1, T1-R...
VOICE NAME	Voice assigned to the trigger. The voices U01... U99 can be loaded from a USB stick.	1 ... 550, U01...U99
VOLUME	Volume	0...16
PAN	Trigger position within the stereo signal (panorama right / left)	-8...8
PITCH	Pitch	-8...8
REVERB	Reverb	0...16
DECAY	Decay	-5...0
PAD SONG	Pattern, Style	1 ... 100, Off

Customising and storing user kits

The existing preset kits can be used as a basis for user kits. The user kits can then be stored in the device memory.

1. ➤ Press **[SAVE]**.
⇒ 'Rename Kit' and the number and name of the first user kit appear on the display.
2. ➤ Change the name as desired. You change the letter on which the cursor is currently located with the jog wheel, you move the cursor with the arrow keys (**[<]** / **[>]**).
3. ➤ To save, select the option 'SAVE'. To cancel, select the option 'CANCEL'.
4. ➤ Use the arrow buttons (**[<]** / **[>]**) or the jog wheel to select a user kit. Press **[ENTER]**.
⇒ The display briefly shows 'SAVE OK!'. The changes to the settings take immediately effect.

Any unsaved changes will be discarded when selecting another kit or the device is turned off.

6.5 Playing, customising and accompanying songs

Style selection

Your digital drum module features a total of 100 preprogrammed songs with different styles: 70 patterns, 6 hits, 24 taps and 2 user songs. You can play the songs and accompany them on the drum module. A song contains a drum part (containing the rhythm in which you play the pads) and an accompaniment part (percussion and melody). The volume of both parts can be adjusted separately.

1. ➤ Press [SONG].
⇒ The name and number of the current song appear in the display.
2. ➤ Use the arrow buttons (▲/▼) to select the parameter to be changed.
3. ➤ Use the arrow buttons ([<] / [>]) to change the parameter value.
4. ➤ Press ▶/■ to play and stop the songs.

Parameter, display	Meaning	Value range
NUMBER	Number of the song.	<ul style="list-style-type: none"> ■ 1...60: Patterns ■ 61...70: Percussion Loops ■ 71...76: Hits ■ 77...100: Taps ■ 101...102: User songs
ACCOM VOL	Accompaniment volume	0...16
DRUM VOL	Drum kit volume	0...16

Song playback from USB stick

The drum module first displays the music files recognized in the 'SONG' directory on the USB stick. But you can switch to any other directory on the medium. From each directory, the first 99 music files are displayed.

Requirements for the music files:

- MIDI: SMF 0, track number less than 16, PPQN 480 maximum, file size 128 kB maximum.
- WAV: Bit rate 1536 kbit/s maximum, sampling frequency 48 kHz maximum
- MP3: Bit rate 320 kbit/s maximum, sampling frequency 48 kHz maximum

If you want to play music files that do not meet these requirements, an error message will appear in the display.

1. ➤ Press [SONG].
 - ⇒ The name and number of the current song appear in the display.
2. ➤ Press [SONG] again.
 - ⇒ The display shows the list of WAV, MP3 or MIDI files detected on the USB stick.
3. ➤ Use the arrow buttons (▲/▼/[<] / [>]) to navigate in the list.
4. ➤ Press [MENU] to open the 'SONG' menu.
 - Use the arrow buttons (▲/▼) to select the option 'USB FOLDER' to change to another directory on the USB stick. Confirm with [ENTER].
5. ➤ Press ▶/■ to play and stop the songs.

6.6 Metronome function

Press [CLICK] to turn the click function on and off again. When the Click is running the indicator LED of the button is flashing.

Settings

1. ➤ Use the arrow buttons (▲/▼) to select the parameter to be changed.
2. ➤ Use the arrow buttons ([<] / [>]) or the jog wheel to change the parameter value.

All changes are immediately effective. Exit the Settings menu by pressing [CLICK] again.

Parameter, display	Meaning	Value range
TIME SIGNATURE	Emphasis on beats	0 ... 9/2, 0 ... 9/4, 0 ... 9/8, 0 ... 9/16
VOLUME	Click volume	0 ... 16
INTERVAL	Beats per measure	1/2, 3/8, 1/4, 1/8, 1/12, 1/16
NAME	Name and number of the corresponding Click voice	METRO, CLAVES, STICKS, COWBELL, CLICK, VOICE
OUTPUT	Click output for headphones only or also for the line output	PHONES, ALL (PHONES+OUTPUT)

The click volume is also influenced by the fader [RIDE/CLICK]. The click is only audible if this fader is not set to zero.

Changing the tempo

1. ➤ Press [TEMPO].
2. ➤ Use the arrow buttons ([<] / [>]) or the jog wheel to change the click tempo.
3. ➤ Confirm with [ENTER] or wait three seconds to reactivate the originally set tempo.

6.7 Fader

The drum module offers six separate faders that can be used to directly adjust the volume of individual pads, the song, or the click. The faders have double assignment. To change from one assignment to another, press [FADER]. The two control LEDs next to the faders indicate which assignment is currently set.

Fader label	Assignment 1	Assignment 2
[KICK]	Kick drum	–
[SNARE]	Snare	–
[TOM]	Tom 1, 2, 3, 4	–
[HI-HAT]	Hi-hat	Drum module
[CRASH]	Crash 1, 2	Accompaniment
[RIDE/CLICK]	Ride	Click

6.8 Recording functions

This feature allows you to use the drum module for recording. You can record your own drum track with or without an accompanying song. The recording can be stored in one of the two user songs as a MIDI file directly in the drum module or stored in an MP3 file on a USB stick.

Recording preparation

1. ➤ Before recording, set the parameters as desired: Tempo, kit, emphasis on beats, beats per measure and song as accompaniment.
2. ➤ Press ●.
 - ⇒ The display shows 'REC'.
3. ➤ If no USB stick is connected, you can use the arrow buttons ([<] / [>]) to choose whether to save the recording as user song 1 or 2.

Starting and stopping recording

1. ➤ When the unit is ready to record ('REC'), press ▶/■ or play a pad.

From the 'SONG' and 'KIT' menus, you can switch to recording standby directly. To do so, just press ●.

⇒ As long as the recording is running, the control LED of the ● button lights up, the display shows 'RECORDING'.

2. ➤ To stop recording, press ▶/■.

6.9 Trigger settings

Adjusting trigger settings

The touch responsiveness can be adjusted to your needs and preferences by the settings of this menu.

1. ➤ Press *[KIT]*.
⇒ The display shows the kit list.
2. ➤ Press *[MENU]*. Use the arrow buttons (▲/▼) to select the option 'TRIGGER' and press *[ENTER]*.
⇒ The display shows the list of trigger parameters.
3. ➤ Use the arrow buttons (▲/▼) to select the parameter to be changed.
4. ➤ Strike the pad whose parameter you want to modify.

5. ➤

For non-changeable parameters, the display shows '–'

Use the arrow buttons (*[<]* / *[>]*) or the jog wheel to change the parameter value. Please note the information in the table below.

6. Press [EXIT] to save the changes and to exit the menu.

Parameter, display	Meaning	Value range
SENSITIVITY	Volume behaviour of a pad regardless of the actual strike intensity. The higher the value, the higher the volume when playing, and vice versa.	1...16
RIM SEN	Touch sensitivity of the rim trigger (snare and toms).	1...16
HEAD-RIM-ADJ	Ratio of touch sensitivity of head and rim.	1...16
THRESHOLD	Threshold value, that determines from what tough intensity a trigger generates a sound. The higher the value, the less sensitive the trigger responses to vibrations of other pads.	1...16
XTALK	If several pads are mounted on a rack vibrations can be transmitted to other pads when you hit a trigger and unintentionally trigger sounds. This cross-talk can be avoided by the appropriate setting. The value should be set as low as possible.	1...16
CURVE	The trigger curve regulates the velocity, i.e., the ratio between the punch and volume. Use setting 'Curve 1' for the most natural ratio between punch and volume. When using 'Curve 2' or 'Curve 3', a strong strike will cause a bigger change. When using 'Curve 4' or 'Curve 5', a light strike will cause a bigger change. With the setting 'Curve 6' the volume changes less upon a change of the strike. High volumes are already reached at a relatively low strike intensity. The figure below shows the various options schematically.	1...6
RETRIG CANCEL	We call it 'double trigger' when multiple sounds are successively produced when playing a pad. This effect can i.a. be caused by irregular waveforms especially in the decaying of the trigger. With this parameter, these distortions can be suppressed. The higher the value is, the higher the likelihood that rapidly successive strikes – such as in a drum roll – are no longer detected. So the value should be set as low as possible.	1...16
MIDI NOTE	Assigned MIDI note	0...127
SPLASH SENS	Touch sensitivity of the Splash trigger. The higher the value, the less sensitive the trigger responses.	1...6

6.10 Utility menu

Adjusting device settings

In this menu, you can change various settings of the device.

1. ➤ Press **[KIT]**.
⇒ The display shows the kit list.
2. ➤ Press **[MENU]**. Use the arrow buttons (**▲/▼**) to select the option 'UTILITY' and press **[ENTER]**.
⇒ The display shows the list of utility parameters.
3. ➤ Use the arrow buttons (**▲/▼**) to select the parameter to be changed.
4. ➤ Use the arrow buttons (**[<] / [>]**) or the jog wheel to change the parameter value. Please note the information in the table below.
5. ➤ Press **[EXIT]** to save the changes and to exit the menu.

Parameter, display	Meaning	Value range
GM MODE	Defines the processing of programme change commands: ON: Programme change commands for MIDI channel 10 are processed as selection (GM kit). OFF: Programme change commands for MIDI channel 10 are processed as selection (local kit).	ON, OFF
LOCAL CTRL	ON: Drum module and MIDI sound are present at the output. OFF: Drum module is muted, only MIDI sound.	ON, OFF
L-R EXCHANG	Allows to switch from left-handed to right-handed configuration of the entire set without having to change the wiring.	ON, OFF
AUTO POWER	Defines the behaviour of the automatic shutoff: <ul style="list-style-type: none"> ■ '30' (automatic shutoff after 30 minutes) ■ '60' (automatic shutoff after 60 minutes) ■ 'OFF' (automatic shutdown off). 	30, 60, OFF

6.11 Compression

Adjusting compression settings

In this menu, you can adjust the compression setting of the device to your requirements.

1. ➤ Press *[KIT]*.
⇒ The display shows the kit list.
2. ➤ Press *[MENU]*. Use the arrow buttons (▲/▼) to select the option 'COMPRESS' and press *[ENTER]*.
⇒ The display shows the list of compression parameters.
3. ➤ Use the arrow buttons (▲/▼) to select the parameter to be changed.
4. ➤ Use the arrow buttons (*[<]* / *[>]*) or the jog wheel to change the parameter value. Please note the information in the table below.
5. ➤ Press *[SAVE]* to store the changes.

Parameter, display	Meaning	Value range
THRESHOLD	Threshold value for compression	0...16
GAIN	Compression intensity	0...16

6.12 USB stick functions

A USB stick can be used to save or play sound files (as songs) or kit settings.

The USB stick must have a capacity of at least 4 GB and be formatted with the FAT file system.

USB stick formatting

Formatting erases all data on the USB stick irretrievably.

1. ➤ Press *[KIT]*.
⇒ The display shows the kit list.
2. ➤ Press *[MENU]*. Use the arrow buttons (▲/▼) to select the option 'USB' and press *[ENTER]*.
⇒ The display shows the 'USB MEMORY' menu.
3. ➤ Use the arrow buttons (▲/▼) to select the option 'FORMAT'.
⇒ A confirmation prompt appears on the display.
4. ➤ Confirm with *[ENTER]* or press *[EXIT]* to exit the menu.

Loading a sample from the USB stick and saving it as a user voice

Samples stored on the USB stick can be loaded into the drum module and saved there as a user voice. The user voices can be used in the same way as the supplied voices. Maximum sample size is 15 MB. It must be stored as a WAV file (mono) with a resolution of 16 bit and a sampling rate of maximum 48 kHz.

1. ▶ Press *[KIT]*.
 - ⇒ The display shows the kit list.
2. ▶ Press *[MENU]*. Use the arrow buttons (▲/▼) to select the option 'USB' and press *[ENTER]*.
 - ⇒ The display shows the 'USB MEMORY' menu.
3. ▶ Use the arrow buttons (▲/▼) to select the option 'SAMPLE LOAD'. Confirm with *[ENTER]*.
 - ⇒ The display shows the list of WAV files detected on the USB stick.
4. ▶ Use the arrow buttons (▲/▼) to select a file. Confirm with *[ENTER]*.
 - ⇒ The display shows 'Load to User Voice'.
5. ▶ Confirm with *[ENTER]*.
 - ⇒ The sample is being loaded. This can take about a minute, depending on the file size.

Storing kit settings on the USB stick

The settings you have made for a kit can be saved on the USB stick and used again later.

1. ▶ Press *[KIT]*.
 - ⇒ The display shows the kit list.
2. ▶ Press *[MENU]*. Use the arrow buttons (▲/▼) to select the option 'USB' and press *[ENTER]*.
 - ⇒ The display shows the 'USB MEMORY' menu.
3. ▶ Use the arrow buttons (▲/▼) to select the option 'KIT SAVE'. Confirm with *[ENTER]*.
 - ⇒ The display shows the list of the kits (01...99). If there is no name next to a kit number, then no kit has yet been saved for this number.
4. ▶ Use the arrow buttons (▲/▼) to select a kit. Confirm with *[ENTER]* or press *[EXIT]* to exit the menu.
 - ⇒ The kit is being saved.

Loading kit settings from a USB stick

The settings for a kit stored on the USB stick can be loaded.

1. ▶ Press *[KIT]*.
 - ⇒ The display shows the kit list.
2. ▶ Press *[MENU]*. Use the arrow buttons (▲/▼) to select the option 'USB' and press *[ENTER]*.
 - ⇒ The display shows the 'USB MEMORY' menu.
3. ▶ Use the arrow buttons (▲/▼) to select the option 'KIT LOAD'. Confirm with *[ENTER]*.
 - ⇒ The display shows the list of the kits (01...99). If there is no name next to a kit number, then no kit has yet been saved for this number.
4. ▶ Use the arrow buttons (▲/▼) to select a kit. Confirm with *[ENTER]*.
 - ⇒ The display shows 'Load to User __?'.
5. ▶ Use the arrow keys (*[<]* / *[>]*) or the jog wheel to select the number of the user kit under which the settings are to be stored in the drum module.

Confirm with *[ENTER]* or press *[EXIT]* to exit the menu.

 - ⇒ The kit is being loaded. This can take about a minute, depending on the file size.

6.13 Reset to defaults

The settings of the drum module can be reset to factory defaults, separated into kits, songs, pad trigger settings, and voices.

1. ▶ Press *[KIT]*.
 - ⇒ The display shows the kit list.
2. ▶ Press *[MENU]*. Use the arrow buttons (▲/▼) to select the option 'FACTORY SET' and press *[ENTER]*.
 - ⇒ The display shows the 'FACTORY SET' menu.
3. ▶ Use the arrow buttons (▲/▼) to select one of the 'KIT' options (reset of settings in the kits section), 'SONG' (reset user songs), 'VOICE' (reset user voices), 'PAD SETTING' (reset trigger pad settings) or 'ALL' (reset all settings). Confirm with *[ENTER]* or exit the menu with *[EXIT]*.
 - ⇒ 'Reset OK!' appears in the display.

7 Technical specifications

Input connections	Power supply	Connector socket for plug-in power supply
	USB port	USB MIDI
	Trigger	1 × combined trigger connection (sub D plug-in connector)
	Tom-Pad	1 × 1/4" phone socket
	Crash-Pad	1 × 1/4" phone socket
	AUX-in	1 × 3.5 mm stereo phone socket
	MIDI	MIDI socket
Output connections	Line out (R/L mono)	2 × 1/4" phone socket
	Headphones	1 × 1/4" phone socket
	MIDI	MIDI socket
Tonal colours	550	
Drum kits	30 preset kits, 20 user kits	
Demo and practice songs	100 preprogrammed songs, 2 user songs	
Power supply	Plug-in power supply (9 V $\overleftrightarrow{=}$), positive centre	
Dimensions (W × H × D)	249 mm × 186 mm × 76 mm	
Weight	kg	
Ambient conditions	Temperature range	0 °C...40 °C
	Relative humidity	50 %, non-condensing

Further information

Rack included	Yes
Seat included	No
Bass drum pedal included	Yes
Headphones included	No
Mesh Head Pads	Yes
Pads in Stereo	Yes
Number of direct outputs	0

8 Plug and connection assignment

Introduction

This chapter will help you select the right cables and plugs to connect your valuable equipment in such a way that a perfect sound experience is ensured.

Please note these advices, because especially in 'Sound & Light' caution is indicated: Even if a plug fits into the socket, an incorrect connection may result in a destroyed power amp, a short circuit or 'just' in poor transmission quality!

Balanced and unbalanced transmission

Unbalanced transmission is mainly used in semi-professional environment and in hifi use. Instrument cables with two conductors (one core plus shielding) are typical representatives of the unbalanced transmission. One conductor is ground and shielding while the signal is transmitted through the core.

Unbalanced transmission is susceptible to electromagnetic interference, especially at low levels, such as microphone signals and when using long cables.

In a professional environment, therefore, the balanced transmission is preferred, because this enables an undisturbed transmission of signals over long distances. In addition to the conductors 'Ground' and 'Signal', in a balanced transmission a second core is added. This also transfers the signal, but phase-shifted by 180°.

Since the interference affects both cores equally, by subtracting the phase-shifted signals, the interfering signal is completely neutralized. The result is a pure signal without any noise interference.

1/4" TS phone plug (mono, unbalanced)

1	Signal
2	Ground, shielding

Three-pole 1/8" mini phone jack (stereo, unbalanced)

1	Signal (left)
2	Signal (right)
3	Ground, shielding

9 Cleaning

Device parts

Clean the accessible parts of the device regularly. The frequency of cleaning depends on the operating environment: moist, smoky or particularly dirty environments may cause a higher accumulation of dirt on the components of the device.

- Use a dry soft cloth for cleaning.
- Remove stubborn stains with a slightly damp cloth.
- Never use cleaners containing alcohol or thinner.
- Never put any vinyl items on the device, as vinyl can stick to the surface or lead to its discolouration.

10 Protecting the environment

Disposal of the packaging material

For the transport and protective packaging, environmentally friendly materials have been chosen that can be supplied to normal recycling.

Ensure that plastic bags, packaging, etc. are properly disposed of.

Do not just dispose of these materials with your normal household waste, but make sure that they are collected for recycling. Please follow the notes and markings on the packaging.

Disposal of your old device

This product is subject to the European Waste Electrical and Electronic Equipment Directive (WEEE) in its currently valid version. Do not dispose with your normal household waste.

Dispose of this device through an approved waste disposal firm or through your local waste facility. When discarding the device, comply with the rules and regulations that apply in your country. If in doubt, consult your local waste disposal facility.
