

User manual

This manual contains important information on the safe operation of the product. Read and follow the safety advice and instructions given. Retain the manual for future reference. If you pass the product on to others please include this manual.

Safety instructions

Intended use

This device is used to digitize audio and video content and to make it available for further processing via USB. Any other use or use under other operating conditions is considered to be improper and may result in personal injury or property damage. No liability will be assumed for damages resulting from improper use.

Danger for children

Ensure that plastic bags, packaging, etc. are disposed of properly and are not within reach of babies and young children. Choking hazard! Ensure that children do not detach any small parts from the product. They could swallow the pieces and choke!

Where to use the product

Never use the product

- in conditions of extreme temperature or humidity
- in extremely dusty or dirty areas
- at locations where the unit can become wet

General handling

- To prevent damage, never use force when handling the product.
- Never immerse the product in water. Just wipe it with a clean dry cloth. Do not use liquid cleaners such as benzene, thinners or flammable cleaning agents.

Features

- USB webcam for video conferencing and video streaming
- Built-in microphone
- Plug & Play without setup
- Compatible with Mac OS and Windows
- Multifunctional holder for standing operation or easy installation on the screen
- 1080p full HD resolution, frame rate 30 fps
- Supports H.264 and MJPEG
- 1/4" thread for tripod mounting
- Including adapter to USB-C
- Automatic electronic shutter
- Power supply and data transmission via USB (5 V \pm 160 mA)
- Cable length: approx. 135 cm

Using the product

1. Mount the camera either on a tripod or on the screen. You can also simply place it on the desk.
2. Connect the USB plug of the camera cable to the USB port of a computer with a Windows or MacOS operating system. If necessary, use the supplied adapter to the USB-C format.
3. The required driver is provided by the operating system and installed automatically. The camera is then ready for use.
4. Start the desired chat or video conference software.

Note

If you use the camera on a laptop that has a built-in camera, you must first deactivate it or set the external camera as the standard device for audio / video recording.
