

## D108 Series DYNAMIC VOCAL MICROPHONE

### Description

Superlux now presents the D108 series dynamic microphone which is a milestone in the world of professional vocal microphones, exhibiting exceptionally uniform frequency response not only on-axis, but also off-axis. And D108 series features the balanced tone and natural sound profiles and delivers clear and warm vocal reproduction.

D108 series comes with two versions, one is D108A designed for recording with tailored vocal sound and best for close miking, and the other is D108B best for live sound performance with a tailored bass punch response.

The modular design of the D108's capsule with its gold-plated connectors permits easy separation of the grille and capsule from the body of the microphone, facilitating maintenance. The D108 has a super-cardioid pickup pattern which isolates the main sound source while minimizing background noise.

Constructed of durable metal with a strengthened mesh grille, foam filter and shock-mount system to cut down handling noise, the D108 is very sturdy, withstanding even the occasional dropping while still producing a sound quality that is unsurpassed. No matter whether indoor or outdoor, singing or speech, the D108's performance will satisfy the most demanding professionals.

### Features

- Tailored to deliver clear and warm vocal reproduction
- Frequency response is good for voice feature and the mid-high frequency band is bright, the low frequency band is solid powerful
- Exceptional uniform frequency response not only on-axis, but also off-axis
- High SPL capacity
- ON/OFF switch with locking function
- Module capsule design, capsule or grille can be turned counterclockwise for easy replacement

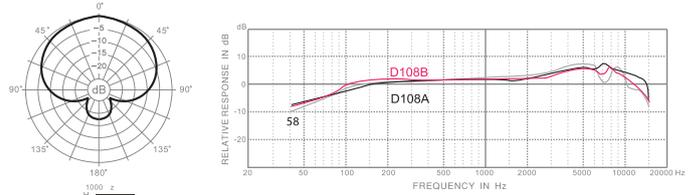

D108A

D108B

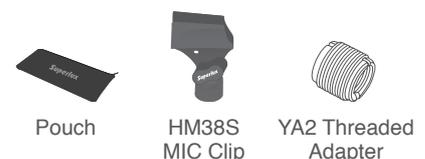

### Specifications

Type	Dynamic
Polar Pattern	Supercardioid
Frequency Response	50 – 16,000 Hz
Sensitivity	-54 dBV / Pa (2 mV)
Max. SPL	150 dB SPL
Finish	D108A: Titanium grey D108B: Black
Connector	XLR3M
Dimensions	Ø48 × 177 mm (Ø1.89" × 6.97")
Net Weight	290 g (10.2 oz)

### D108 Frequency Response ( Supercardioid )

### Included

This information sheet contains important information for the safe use of the product. Read and follow the safety and handling instructions given here. Please keep this information sheet for future reference. If you pass on the product described overleaf, please enclose this information sheet.

## Safety instructions

### Intended use

This device converts acoustic signals in electrical signals. Any other use or use under the conditions excluded here is considered improper and can lead to personal injury or property damage. Neither the manufacturer nor the distributor is liable for damage resulting from improper use.

### Choking hazard for children

 Make sure that plastic sleeves, packaging, etc. cannot get into the reach of babies and small children. Do not allow children to use electrical devices unsupervised. They could loosen parts of the product, then swallow them and choke on them!

### Place of operation

The device must not be used

- ▶ at particularly high temperatures or humidity
- ▶ in particularly dusty or polluted places
- ▶ in places where it can be exposed to moisture

### General handling

To prevent damage, never use force when handling the product. Never immerse the product in liquids. Just wipe it with a clean, dry cloth. Never use liquid cleaners such as benzene, thinner, or flammable detergents to clean the product.

## Disposal

### Old devices

Devices with this label are subject to the current EU directive on waste electrical and electronic equipment (WEEE directive) and may not be disposed of with household waste, but only via a suitable disposal company. Ask your local authority or your specialist dealer about your options for proper disposal.

### Packagings

Environmentally friendly materials have been selected for the packaging and are to be recycled. Do not just throw away plastic sleeves, packaging, etc., but recycle them. If necessary, note the instructions and labels on the packaging.
