KINGMAN™ BASS SCE:

Oh yes, we did! From deep within our cavernous Research and Development labyrinth down at Fender Headquarters, we've come up with this totally new take on the acoustic bass guitar! It was designed for the discerning bassist, yet it is friendly to guitarists as well. From its Jazz Bass® headstock, neck shape, strap button, and machine heads, it feels like home to the electric bassist, but it embodies all the deep and rich tones an acoustic player looks for. With a solid spruce top, traditional bridge, gold pickguard and lusciously bound fingerboard with eye-catching block position inlays, this bass is destined to make groundbreaking music!
