

JCA50H

DESIGN BY: **SOLDANO**

With the same preamp circuit set as our flagship JCA100H and half the output power, JCA50H will reach power amp distortion at lower volume levels. Two 6L6 tubes, beefy custom-wound transformers and a solid-state rectifier keep it tight and punchy. The Normal channel ranges from bright cleans to big distortion. The Overdrive channel is THE infamous Soldano overdrive.

- 50 watts - all tubes.
- Two Master Volume controls
- Tube-driven effects loop
- 5x12AX7 ★ 2x6L6 Tubes
- 3-Band EQ with Presence Control
- Footswitch included

ESTIMATED STREET PRICE:

\$599.99 USD
