

EXPEDITION XP150

Portable PA

PRODUCT INFORMATION

2014

©2013 Samson. Preliminary Literature. All product descriptions and specs subject to change.

The Expedition XP150 offers a PA solution that combines powerful stereo sound with portability and simplicity. With its clever design, the XP150 packs up into a single unit that weighs only 24 pounds. Perfect for schools, conferences and presentations, as well as musicians and singer-songwriters, the XP150 is the ultimate in portable sound.

A removable 5-channel mixer powers the XP150 with a 150-watt (2 x 75) Class D amplifier. The mixer features three Mic/Line channels with XLR and 1/4-inch inputs, allowing you to connect microphones or line signals. It also includes one stereo 1/4-inch and 3.5mm input channel for connecting external devices like MP3 players, keyboards and more. There's also a built-in DSP to add Digital Reverb to your voice or instrument. Each channel features 2-band (bass and treble) controls.

The XP150's 2-way vented speakers give you a clean, powerful stereo sound. They produce deep bass tones, as well as pure dispersion and loud, lucid audio, through 6-inch low frequency drivers and custom 1-inch tweeters with 60° x 90° coverage. For display flexibility, these ABS, high impact plastic enclosures feature integrated 1 3/8-inch speaker stand mounts, as well as a kickback design for use as floor monitors.

The Expedition XP150 stands out as a complete portable PA system that is perfect for small- to medium-sized musical, educational, business and recreational applications.
