

SRMSERIES

1600W High-Definition Powered Loudspeakers

Built To Be Worked

“Mackie’s SRM550 and SRM650 1600W High-Definition Powered Loudspeakers deliver on Mackie’s “Built-Like-A-Tank” SRM legacy in a professional-grade all-wood cabinet design with the modern output, clarity and simplicity you demand from a portable loudspeaker.”

QUICK PITCH

CLASS-LEADING POWER With two amazing sounding full-range boxes, SRM Series Powered Loudspeakers deliver the modern output you demand, pumping out 1600 watts of raw power via custom high-output transducers to deliver gig-level volumes with room to spare.

BUILT-LIKE-A-TANK These extremely tough, 15mm professional-grade all-wood cabinets feature a black steel grille and substantial internal bracing that not only adds natural character to your sound, but it ensures your speaker will survive continuous gigging night after night.

HIGH-DEFINITION AUDIO Mackie’s HD Audio Processing involves the detailed measurement and analysis of SRMs key acoustical components. Then we create and apply patented acoustic correction algorithms that reveal an open, natural sound that can only be described as high-definition.

ONBOARD MIXING With the ability to blend such a wide range of inputs, SRM’s integrated 2-channel mixer, using Mackie’s Wide-Z™ inputs, can handle anything from mics to guitars to mixers with a single knob twist. Plus there’s a stereo RCA input perfect for any A/V application.

READY FOR ANYTHING Flexibility is critical in a portable PA system. A single loudspeaker may need to be a monitor, main or stand-alone speaker. Place SRM speakers on a tripod, subwoofer or on it’s side as 60-degree monitor. Even installs are no problem via the M10 rigging points.

FEATURES & BENEFITS

SRM550
1600W 12" 2-WAY POWERED LOUDSPEAKER

SRM650
1600W 15" 2-WAY POWERED LOUDSPEAKER

VISUAL OVERVIEW

SPEAKER MODES

With just the push of a button, quickly choose between one of the four specific speaker modes to instantly optimize the system EQ and internal voicing for the application at hand.

1. **PA Mode** for flat general sound reinforcement use.
2. **DJ Mode** for extended low end bass performance.
3. **Monitor Mode** for the right stage wedge sound.
4. **Soloist Mode** when connecting a mic and instrument.

SPEAKER MODES

SRM System Power:	• 1600W Class-D Power Amplifiers
System Protection:	• Smart Protect™ DSP protection
Custom Transducers:	• 12" high-output LF driver (SRM550) • 15" high-output LF driver (SRM650) • 1.4" titanium dome compression driver
Speaker Modes:	• PA, DJ, Monitor and Soloist voicing modes
2-Channel Mixer:	• Dual Wide-Z™ inputs with level control • XLR/TRS/Instrument & RCA connections
High-Definition Processing:	• Patented EAW acoustic correction • Transducer alignment/phase correction • Precision 2-way digital crossover
Feedback Destroyer:	• Up to four narrow 1/16th octave filters
LED Indicators:	• Running Man Logo on/off
Cabinet Construction:	• 15mm All-wood internally braced cabinet • Textured scratch-resistant black finish • Rugged 16-gauge steel grille • Front ported for maximum low-end • 60-degree monitor angle & voicing
Cabinet Features:	• Stand / pole mountable • Flyable via M10 rigging points
Handling Weight:	• 37 lbs / 17 kg (SRM550) • 48 lbs / 21.6 kg (SRM650)
