

# Snare Drum Rack

DRS9000 / 14294

## Features and Benefits

Securely store up to five snares and create an attractive drum display with our DRS9000 Snare Drum Rack. Five pairs of support arms made of heavy-duty steel each hold up to 18 lb to ensure reliable equipment support. The horizontal space between the support arms adjusts to safely hold any size drum up to 16" in diameter. The vertical space between the crossbars adjusts to fit various snare heights to accommodate a wide range of drum combinations. Squeeze-to-release handles enable efficient positioning of the support arms, making it easy to add new drums or change the order of an existing drum collection. Unused crossbars and support arms can be removed for a clean, organized look and reattached as needed. Rubber sleeves and end caps on each support arm protect drum finishes and stabilize the drums to prevent rattling and ringing. Two smooth-rolling casters and a handlebar provide handcart-style mobility for ease of relocating the rack. For semipermanent placement, the rack can be assembled without casters.

## Specifications
