

- Halogen lamp suitable for PAR 56
- Special lamp for professional lighting for stages and theatres
- GX16D base
- Power rating: 300 W
- Colour temperature: approx. 3000 K
- Operating voltage: 220 - 240 V
- Dispersion characteristics:
Item no. 579098 – NSP (Narrow Spot) / narrow
item no. 579099 – MFL (Medium Flood) / medium
item no. 579100 – WFL (Wide Flood) / wide
- Dimensions (D × Ø): 127 mm × 178 mm
- Weight: 560 g

This lamp is designed for use on stages and in theatres and is not suitable for lighting domestic rooms.

General information

This document contains important information. Read and follow the instructions. Keep the document for future reference. If you pass the product on to others, please include this document. Contents are subject to change. Please refer to the latest version of the documentation, which is available for download at www.thomann.de.

Intended use

This product is intended for use as a lighting effect. The product is designed for professional use only and is not suitable for domestic use. Any other use or use under other operating conditions is considered to be improper and may result in personal injury or property damage. No liability will be assumed for damage resulting from improper use. This device may be used only by persons with sufficient physical, sensory, and intellectual abilities and having corresponding knowledge and experience. Other persons may use this device only if they are supervised or instructed by a person who is responsible for their safety.

Risk of injury and choking hazard for children!

Children can suffocate on packaging material and small parts. Children can injure themselves when handling the product. Never allow children to play with the packaging material and the product. Always store packaging material out of the reach of babies and small children. Always dispose of packaging material properly when it is not in use. Never allow children to use the product without supervision. Keep small parts away from children and make sure that the product does not shed any small parts that children could play with.

Risk of death from electrical current!

Electric shocks can cause loss of life as well as fires. Maintenance and repair work may only be performed by a qualified electrician. The wiring and replacement of light sources may only be performed by a qualified electrician. Before work on the electrical installation begins, the device must be turned de-energised (unplug the mains plug).

Risk of burns on the hot lamp!

The lamp heats up during operation and can cause burns if it comes into contact with skin. Do not touch the lamp during operation or shortly thereafter. Before changing a lamp, let the respective lamp cool down sufficiently.

Risk of eye injuries caused by high light intensity!

The device generates high-intensity light radiation. Looking directly into the light source can damage the eyes. Never look directly into the light source.

Damage to the device if operated in unsuitable ambient conditions!

The device can be damaged if it is operated in unsuitable ambient conditions. Only operate the device indoors within the ambient conditions specified in the "Technical specifications" chapter of this user manual. Avoid operating it in environments with direct sunlight, heavy dirt and strong vibrations. Avoid operating it in environments with strong temperature fluctuations. If temperature fluctuations cannot be avoided (for example after transport in low outside temperatures), do not switch on the device immediately. Never subject the device to liquids or moisture. Never move the device to another location while it is in operation. In environments with increased dirt levels (for example due to dust, smoke, nicotine or mist): Have the device cleaned by qualified specialists at regular intervals to prevent damage due to overheating and other malfunctions.

Environmentally friendly materials have been chosen for the packaging. These materials can be sent for normal recycling. Ensure that plastic bags, packaging, etc. are disposed of in the proper manner. Do not dispose of these materials with your normal household waste, but make sure that they are collected for recycling. Please follow the instructions and markings on the packaging.

Observe the disposal note regarding documentation in France.
