

FLEXI SCREEN ULTRA

STUDIO Line

FEATURES Flexi Screen Ultra

Flexi Screen Ultra is the ideal portable solution for vocal recording in untreated rooms, or venues which lack sufficient acoustic control. It performs on untreated and scattered room reflections, effectively isolating the sound source.

Flexi Screen Ultra is made from high quality materials. Its polyurethane structure is designed to give maximum absorption efficiency. The addition of wood to the exterior surface helps create a barrier and gives an attractive visual effect. The singer's energy is absorbed on the inside of the unit, producing a dryer, less ambient sound. At the same time, scattered room reflections are treated on the outside.

Flexi Screen Ultra can be used with a range of microphones and can be adjusted either horizontally or vertically.
