

HD25 / HD50

Bass Combos

PRODUCT INFORMATION

2014

The all-new HD25 and HD50 Bass Combos pack Hartke's revolutionary HyDrive speakers into two sleek models ideal for bedroom practice/jam sessions and small rehearsal spaces, and capable of greatly enriching your low-end tone. The HD combos also maintain Hartke's commitment to producing high quality bass amplification with exceptional durability.

The HD25 (25 watts, 8-inch driver) and HD50 (50 watts, 10-inch driver) employ Hartke's patented HyDrive speaker technology that utilizes a hybrid paper and aluminum cone attached to a ceramic magnet. The tone produced by the HyDrive design sparked a revolution in bass speaker technology with the paper providing warmth and roundness and the aluminum offering the punchy attack that appeals to players and listeners alike.

Packed with professional features, these HD Series combos are designed to be user-friendly and reliable for players of all levels. Both combos offer Volume, Bass, Mid and Treble controls on their top-mounted amplifier panels, allowing for easy adjustments. The combos feature a 1/8-inch stereo Aux input for playing along with your favorite tracks via an MP3 player and a 1/4-inch headphone output for more intimate practice sessions. In addition, the HD25 and HD50 each have a built-in limiter to ensure constant amp operation at safe levels. Lastly, these solid enclosures are finished in a stylish fashion, each with a sleek, perforated black metal grill and molded strap carry handle.

With the exceptional tone of HyDrive speakers housed in two durable, highly portable enclosures, Hartke's HD25 and HD50 Bass Combos are able to perform at levels far beyond ordinary bass combos.
