

HD75 / HD150

Bass Combos

The all-new HD75 and HD150 Bass Combos pack Hartke's revolutionary HyDrive speakers into two sleek models capable of greatly enriching your low-end tone and with enough power to handle any rehearsals space or small performance venues. The HD combos also maintain Hartke's commitment to producing high quality bass amplification with exceptional durability.

The HD75 (75 watts, 12-inch driver, 2-inch tweeter) and HD150 (150 watts, 15-inch driver, 2-inch tweeter) employ Hartke's patented HyDrive speaker technology that utilizes a hybrid paper and aluminum cone attached to a ceramic magnet. The tone produced by the HyDrive design sparked a revolution in bass speaker technology with the paper providing warmth and roundness and the aluminum offering the punchy attack that appeals to players and listeners alike.

Packed with professional features, the HD combos are designed to be user-friendly and reliable for players of all levels. Both combos offer Volume, Bass, Mid and Treble controls on their top-mounted amplifier panels, as well as a 7-band graphic EQ, allowing for easy adjustments. The combos feature a full effects loop, as well as a 1/8-inch stereo Aux input for playing along with your favorite tracks via an MP3 player and a 1/4-inch stereo headphone output for more intimate practice sessions. The HD150 also has an XLR direct output for routing your signal to a mixer in both live and studio settings. In addition, the HD75 and HD150 each have a built-in limiter to ensure constant amp operation at safe levels. Lastly, these solid enclosures are designed in a stylish fashion, each with a sleek, perforated black metal grill and convenient transport tooling (HD75: molded strap top handle, HD150: side handles and castors).

With the exceptional tone of HyDrive Speakers housed in durable, highly portable enclosures, Hartke's HD series Bass Combos are able to perform at levels far beyond ordinary bass combos.
