

ProPAD™ Monitor Isolators

- ◆ Increased mid-range resolution
- ◆ Deeper, more focused soundstage
- ◆ Improved low-frequency definition
- ◆ Angle adjustable to optimize listening axis
- ◆ Significant reduction of extraneous mechanical resonance

ProPAD™ Monitor Isolators

The **Auralex® ProPAD™** features a durable, three layer highly damped construction that provides superior isolation from the vibrations and resonant energy created by the studio monitors, preventing this energy from being transmitted into the supporting furniture.

ProPADs™ are constructed with a flat **Auralex® PlatFoam™** base layer and includes an additional **PlatFoam™** wedge for angled applications. **ProPADs™** are extremely useful for decoupling monitors and reducing structural vibrations.

Visit us online for more great sound isolation products.

ProPADs™ are a premium version of our current best-selling MoPADs™. **ProPADs™** are designed to work with most standard-sized near-field monitors using 5.25", 6.5" or 8" woofers.

The new design features a 3/4" Melamine-wrapped MDF base covered with a thick layer of **ISO-Plate™**, the same isolation material as our **HoverDeck™ ISO-Pucks™**, which are made from 100% recycled rubber.

Features:

- ◆ 8" wide x 13" long; 2.125" thickness
- ◆ Angle Adjustable Auralex® PlatFoam™ Base Layer
- ◆ Durable Melamine Finish
- ◆ Slip-resistant ISO-Plate™ Top

ProPAD™ Product Specifications:

Dimensions	8" wide x 13" deep x 2.125" high
Construction	3/4" Melamine-wrapped MDF base
Isolation	3/8" ISO-Plate™ slip-resistant top
	Includes user configurable Platfoam™ dual wedge base
