1XLOW

1XHIGH

*Sensitivity: 116 dB/mW*

*Frequency Response: 20 Hz -19 kHz*

*DCR: 44 ohms*

*Driver: 2 drivers (2 way crossover)*

## CARACTERISTICS

The SM2-IFI EarSonics offer the best choice to enter high-end audio listening.

Completely new sound design, the SM2-IFI becomes the Earsonics gateway range model and replaces the excellent SM1 with 100% new components.

We opted for a new two large transducers architecture for best headroom and easy drive, also a new crossover design for “audiophile” clearer sound.

The SM2-IFI was born from the desire to provide audio high-end access , at very competitive price with quality component;

Also, preserving the EarSonics spirit,

The SM2-IFI is our our latest products knowledge development result, as well as audiophiles requests and demands.

## REPLACABLE CABLE.

We know that the cable will always stay the weak point of any earphones. That’s why we’ve designed our cable to make it resistant and also replacable.
