1XMID

1XHIGH

Sensibilité: 122 dB/mW

Réponse en fréquences: 20 Hz -18 kHz

DCR: 34 ohms

Driver: 3 drivers (3 way crossover)

CARACTERISTICS

EarSonics SM3 pushes further the limits achieved by the SM2 for universal in-ears: more aeration, a wider sonic image, more defined lows and detailed highs with an incredible finesse. All of this with EarSonics' trademarked neutrality accuracy. The V2 offers new ergonomic design and replaceable cable.
