

# FELiX connections

Nothing too terribly hard and fast here - just the basics about how to plug stuff in and out of your preamp. **INPUT paths are shown in amber.** **OUTPUT paths are shown in green.**

There are many ways to connect a huge array of instrument sources to FELiX. If you aren't sure about how something works, please have a look at your owner's manual, check out our website - [www.gracedesign.com](http://www.gracedesign.com) - or feel free to call us. We are always glad to help out in any way we can. 1.303.823.8100, M-F, 9-5 MST
